Swivelling Floor Connector

Cable spacing:
Panel/Shelf width + 8mm

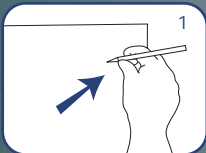

AXIS SIGNMOUNTS

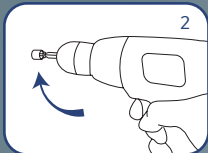

SIGNMOUNTS

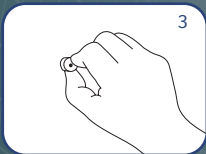

INSTALLATION SEQUENCE

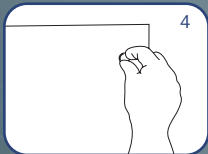

1
Drill holes in panel. Use panel to mark hole positions on wall

2
Screw threaded cups into place

3
Thread standoffs over threaded cups

4
Thread thumbscrews through panel into standoffs

AXIS SIGNMOUNTS

Adding class to wallmounted sign panels

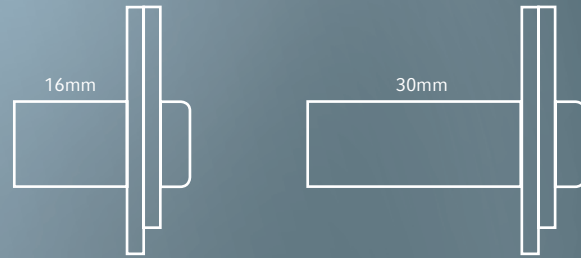

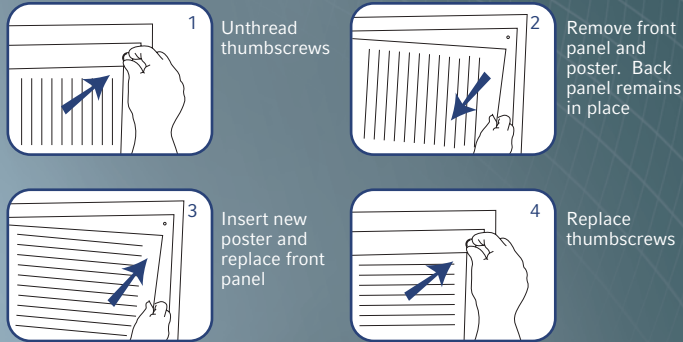

- Attractive solution to the challenge of mounting sign panels
- Quick and easy to install
- Available in four different standoff heights as well as Flatmounts and Jumbo Signmounts
- Suitable for panels 2mm thick to 9mm thick
- Long reach thumbscrews available for panels 10mm to 15mm
- Super long reach set up available for panels 16mm to 20mm

AXIS ULTRAMOUNTS

Display posters between two panels

- Same appearance as signmounts
- Designed to allow the poster to be changed out
- Backing panel stays in place when thumbscrews are removed
- Same installation procedure as Signmounts
- Available with 16mm or 30mm standoff

CHANGEOUT SEQUENCE

ULTRAMOUNTS

LETTERMOUNTS

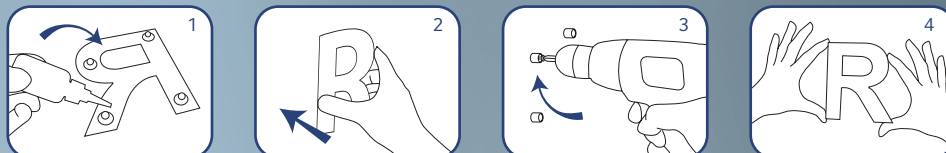

AXIS LETTERMOUNTS

The quick, effective way to mount 3-dimensional letters

- UV resistant for interior and exterior use
- Available in two sizes - 15mm and 25mm standoff
- Very easy to install
- Use Loctite 406 to attach to Acrylic letters - see page 29

INSTALLATION SEQUENCE

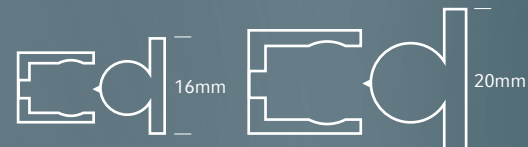

Adhere ball part to back of letters

Place letter on wall in desired position. Centre spikes on ball part will mark positions for cup part

Screw cup parts to wall

Pop letters into place

Standard - 15mm standoff

Jumbo - 30mm standoff

CUBEMOUNT

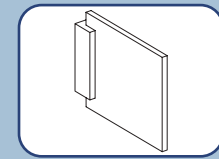

CUBEMOUNT

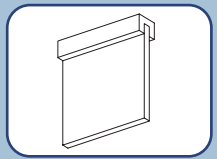

The versatile panel mounting system

- Four uses from one mount - wall mount, projecting, counter top and ceiling mount
- Suitable for panels up to 6mm thick
- Quality satin aluminium finish
- Six lengths available - 60mm, 100mm, 150mm, 200mm, 300mm and 400mm

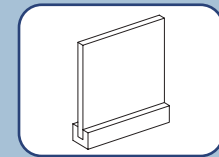

Four uses from one mount

ACCESSORIES

S-FLEX MEDIA TENSIONING SYSTEM

S-Flex is a lightweight, low profile tensioning system that can be used with almost any type of flexible media and tensions without the need for specialised tools. S-Flex is suitable for a huge range of applications including large outdoor signage, retail and exhibition signage and can also be retro fitted to existing lightboxes.

The S-Flex System is compatible with most commercially available flexible media, including PVC; frontlit and backlit, mesh, canvas, textiles and many other substrates. It is recommended to use media between 450gsm and 600gsm.

- Quick and easy to install
- No specialised tools required
- Flexible media can be changed out
- Available in 3m lengths for easy transportation
- Suitable for signage up to 20m long x 5m high
- Three different sections available for different applications

S-FLEX CROSS SECTIONS

F Section

- **F SECTION** This profile is used where larger or stronger fixings are required. The tail strip provides the space needed for fixing the frame to the mounting surface. This section is more tailored for use on outdoor sites like exterior walls, larger signage frames and rigid truck bodies.

Y Section

- **Y SECTION** This design is used to make up complete structural frames. Graphics can be printed, then tensioned and delivered complete to site for hanging. Frames can be mounted back-to-back for double sided graphics.

C Section

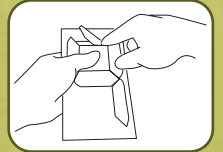

- **C SECTION** This frame is a lightweight solution to install flexible graphics which require smaller fixings. Ideal for use on lightboxes for backlit graphics.

PVC Tension Strip

- **PVC TENSION STRIP** This profile is inserted into the aluminium frame to fix the flexible substrate in position and simultaneously create the tension required.

PIVOT PRICERS

Easy to change

PIVOT PRICERS & SLOT SIGNS

PIVOT PRICERS

The easiest changeable pricing and numbering system available

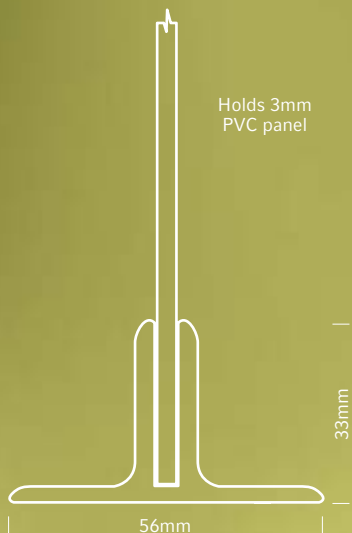

- Easy to read
- Rotate the sections by hand to form any number
- Suitable for interior and exterior use
- Completely self-contained - no loose components
- Available in five letter heights - 30mm, 60mm, 80mm, 160mm and 240mm

SLOT SIGNS

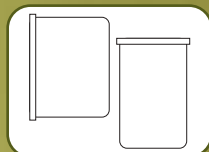

Changeable projecting signs

- Durable powdercoated aluminum and PVC construction
- Panel can be removed - no tools required
- Stock colour - White bracket and panel
- Interchangeable panels available
- 15 stock sizes - cut down panels to achieve non stock sizes

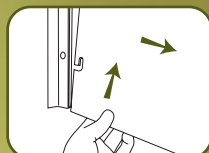

SLOT SIGN

SLOT SIGN

Can be used vertically or horizontally

Easily detachable
